**bellfires.** gas fires

# Start WONDERING.

Discover BOX gas. One of the most innovative stoves, with seamless construction and minimalist inspired design. The BOX gas will make a bold statement in any interior. Be inspired. Be amazed.

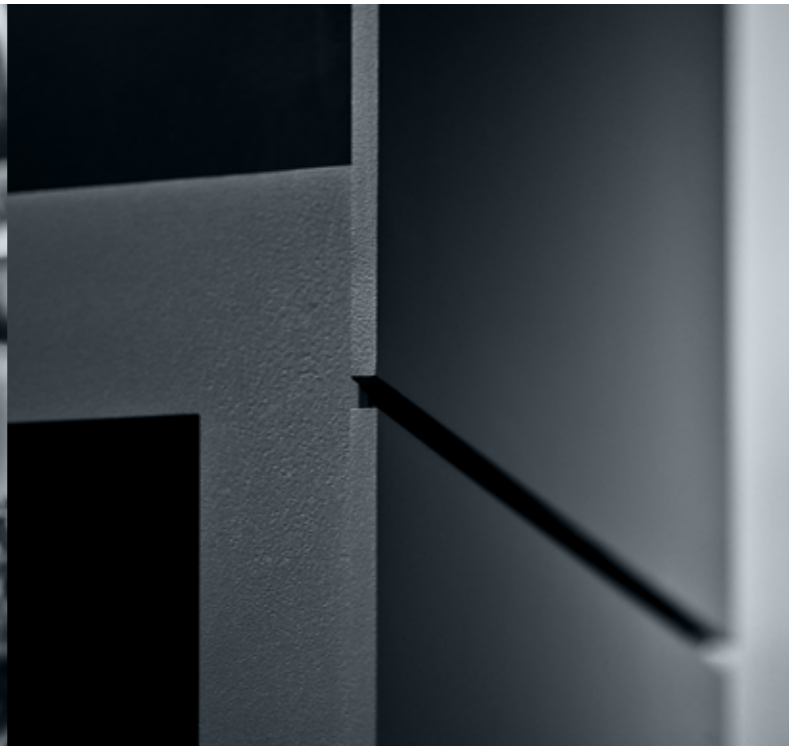

BOX gas 45 with storage module

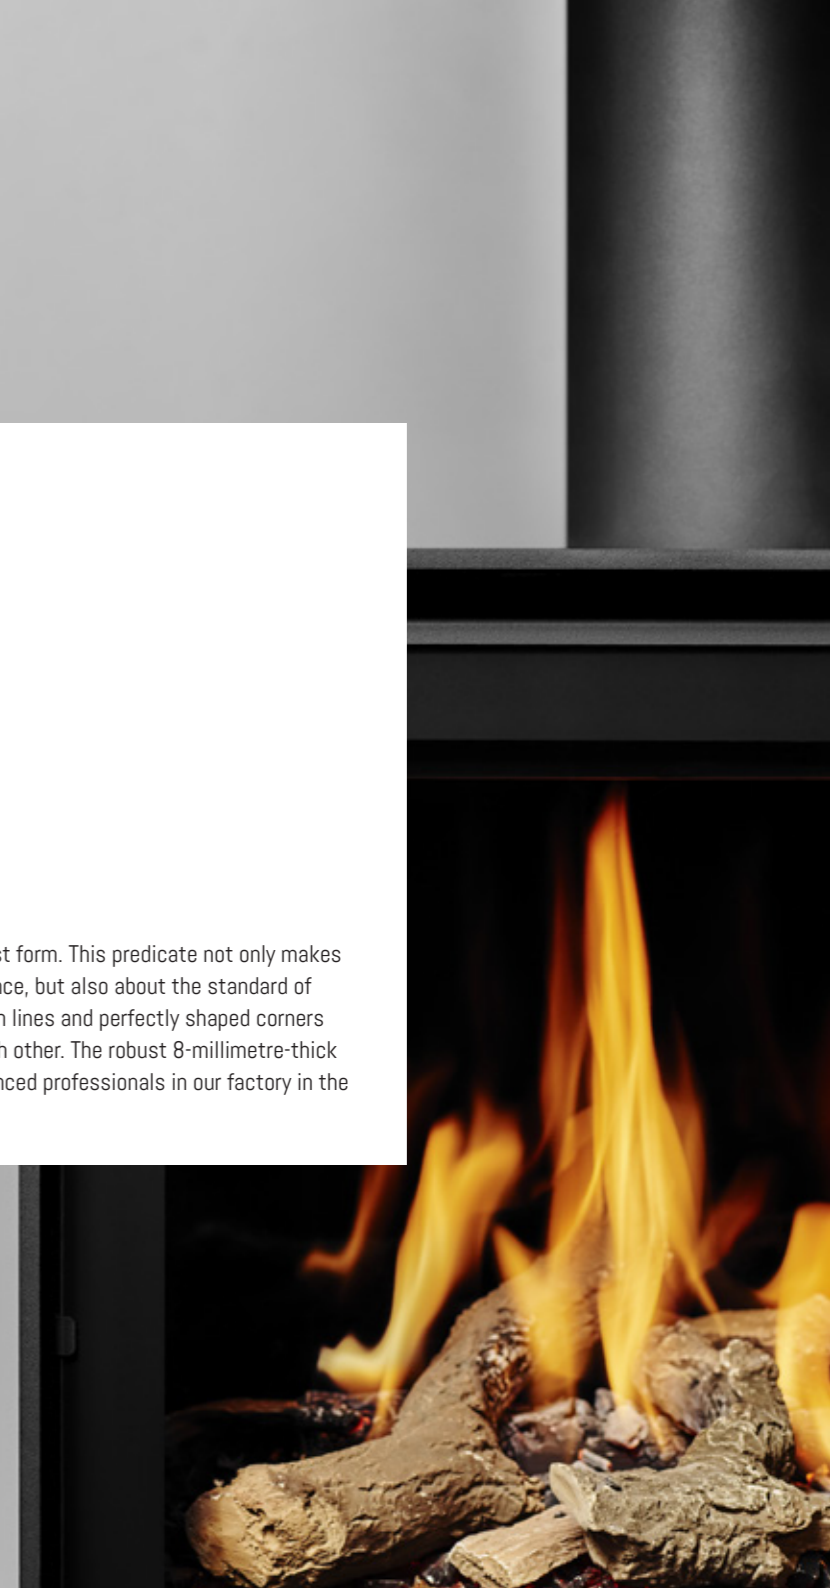

Always  
in  
STYLE.

This stove can proudly bear the name BOX gas, because the designers have surpassed themselves yet again. BOX gas is pure because of its simplicity, so all the focus goes on the spectacular flames. BOX gas gives new meaning to the experience of fire. Start to see the wonder.

## Dutch DESIGN.

This is Dutch Design in its purest form. This predicate not only makes a statement about the appearance, but also about the standard of finish. BOX gas consists of clean lines and perfectly shaped corners that connect seamlessly to each other. The robust 8-millimetre-thick steel is hand crafted by experienced professionals in our factory in the Netherlands.

BOX gas 55 with storage module

# It's MAGNIFICENT, it's MAGNIFIRE.

BOX gas has a totally new burner with logs that are indistinguishable from the real thing: the MagniFire. The stepped burner makes it possible to create a large 3D fire in the BOX gas with integrated mood lighting. Due to the controllability of the double burner the BOX gas creates atmosphere all year round.

## MADE with LOVE.

Bellfires now has over 40 years of experience in designing and manufacturing the best fireplaces. A great fire experience is in our DNA. Everything comes from craftsmanship, 170 people who are proud of every fire they make. Each appliance is tailored to the specification of the customer. This makes each fire a personal master piece. Bellfires pay a lot of attention to the quality and fire experience, we do not just say "crafted for wonder".

BOX gas 65

Make it as  
**PERSONAL**  
as possible.

Make BOX gas the way you want it: choose from different sizes, with or without a storage module. This allows you to customise BOX gas to suite your requirements. Ask your retailer about the possibilities.

# Determining heating capacity.

How do I determine the capacity my fireplace needs to heat the desired space?

You can easily determine the capacity of the fireplace that you need to heat the desired space. The graph below shows the capacity expressed in kilowatts (kW). The space to be heated is expressed in cubic metres (m<sup>3</sup>). The number of cubic metres is determined by the length, width and height of the room to multiply. You can then read the required power at the intersection of one of the three lines. Which of the three lines you need to choose depends on how well insulated your home is.

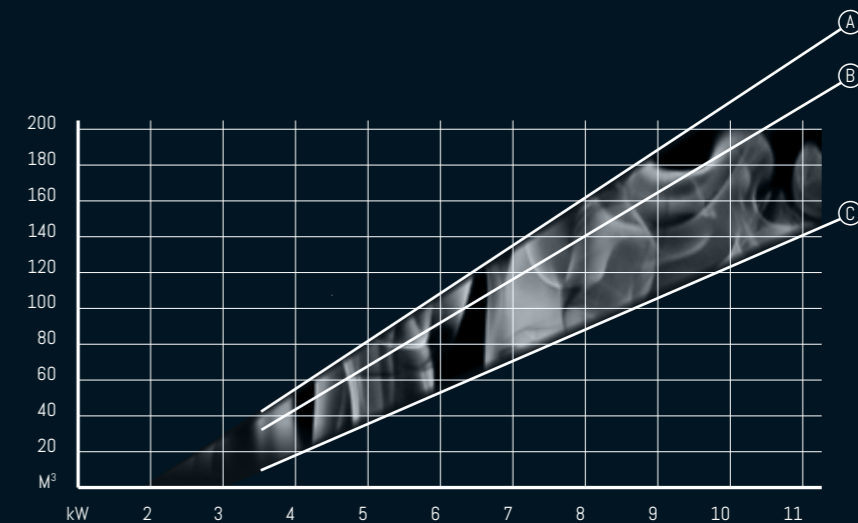

**Line A:** applies to a well insulated house. The house has double glazing, wall insulation and floor insulation.

**Line B:** applies to a reasonably insulated house. The house has double glazing at minimum.

**Line C:** applies to a poorly insulated house. The property has none of the above mentioned forms of insulation.

### Please note!

There are also certain factors that cause increased heat loss in the home. One example is an open kitchen or an open staircase. This results in heat lost. This heat loss can be absorbed by choosing a fireplace or stove with a larger one capacity in these situations. That is why we always advise you to consult your expert before making a choice.

## Service and warranty.

If a device is discontinued, Bellfires ensures that the parts necessary for the correct functioning of the appliance are available for at least 10 years, after production ceases or that replacement parts are available.

Installation and maintenance  
Behind every Bellfires product is technology.

That is why our products are only delivered through a network of expert Bellfires dealers. Specialists know everything about building, placing and installing fireplaces, about efficiency and air management, safety, oxygen supply and flue gas discharge. They guarantee targeted personal advice to ensure correct, responsible and safe installation.

Annual maintenance of the installation is essential to continue enjoying your Bellfires and is strictly recommended. Please arrange this with your dealer.

### Service and warranty

With a Bellfires fire you are assured of absolute top quality. Backed up by one of the finest services. Any malfunction or defect will be rectified as soon as possible through your dealer, who may call in the specialised Bellfires service team.

The Bellfires fireplaces undergo a large number of checks before they leave the factory in Bladel. As a result, all fireplaces meet the high quality standards that Bellfires sets for its products. That is why Bellfires gives a 10-year warranty on the casing and a 1-year warranty on parts.

## Welcome to our showroom.

Our attractive showroom in Bladel - south of Eindhoven - contains a selection of our most recent Barbas and Bellfires fireplaces and stoves, spatially displayed to show them to their full advantage while burning. Be inspired and come and take a look. You are more than welcome! The showroom is open from Monday to Friday from 8.30 to 16.30 and on Saturday from 10.30 to 16.00. We look forward to welcoming you soon.
